

EnviroWare[®]

Takeaway food packaging
from natural sustainable
& renewable resources

Celebration
www.celebration.co.uk

Our Natural Materials

Plant Starch PLA

Manufactured by NatureWorks LLC, Ingeo PLA (Polylactic Acid) is a biopolymer derived entirely from plant resources. The polymer is made from simple plant starch from abundant feedstocks such as corn. The end result is a PLA product which performs comparably to those made from traditional petrochemical based plastics.

Products include:

Cold Drink Cups & Lids
Combination Pots
Deli / Salad Containers & Lids
Portion Pots & Lids

Paper

Paper is a versatile material and especially appealing when it comes from sustainable FSC® (Forest Stewardship Council® C113967) certified sources. We now have a wide range of paper products in white or kraft coloured FSC® paper.

Products include:

Paper Hot Drink Cups
Paper Food Containers
Kraft Paper Food Trays
Naturals Heavyweight Plates
Paper Portion Pots
Paper Cutlery
EcoTensil® EcoTaster Spoons Paper Straws

Bamboo

Bamboo is one of the world's fastest growing woody plants, growing as quickly as 2 feet per day. It can be harvested much faster and more frequently compared to hardwood trees. Making bamboo fibre a highly sustainable substitute for wood-based paper.

Our Bamboo fibre products are certified by FSC® (Forest Stewardship Council C113967)

Products include:

Bamboo Fibre Double Wall Cups

Bagasse

Bagasse is made from natural non-wood fibres, deriving from fast growing plants such as sugarcane.

Products include:

Plates, Platters, Bowls & Trays
Hinged Food Boxes
Rectangular Food Containers
Portion Pots
Cutlery

Wood

Celebration are FSC® (Forest Stewardship Council® C113967) certified and we ensure our wooden products are sourced from sustainable sources.

Products include:

Wooden Cutlery (including wrapped options)
Drinks Stirrers
Skewers

Palm Leaves

Produced in India, Palm Leaf plates and platters are made from discarded leaves from the Adaka nut palm. The leaves are collected, cleaned and then mechanically pressed in a mould at 120°C; no additional treatments are required. Each individual item has its own unique pattern and structure.

Products include:

Plates, Platters & Bowls

Food & Drink packaging made from natural, sustainable & renewable resources

Celebration launched the EnviroWare® range in 2007 as a solution for customers wanting sustainable takeaway packaging. EnviroWare® food & drink packaging is made from natural raw materials. Once the packaging has been used, most can be commercially composted (meeting the EN13432 composting standard).

Celebration are members of the Foodservice Packaging Association and certified by BRCGS (British Retail Consortium), ISO 9001 quality management and ISO 14001 environmental management systems. You can rest assured that we have the best possible products and processes in place.

Most of our paper and wooden products are FSC® (Forest Stewardship Council® C113967) certified, demonstrating our commitment to using sustainable materials, from a responsible source. Look out for FSC® certified products throughout the EnviroWare® brochure.

Please contact us for further information on our products and associated accreditations.

Our Environment : Less fossil fuels

Oil is a finite resource, as such society is placing a greater importance on moving away from a dependency on oil based packaging. EnviroWare® foodservice disposables help to meet this need...

Packaging returned to the ground as compost

Commercial composting of EnviroWare® products, produces compost which can be used as a fertiliser for growing new plants and crops.

Disposal

Disposal options for EnviroWare® products include: Commercial Composting, Incineration (with scope for energy recovery) and Recycling.

Science & Technology

Natural materials are turned into high quality food service disposables.

Environment

Less fossil fuel is used in production.

Climate

Potential to reduce CO2 emissions.

Contents

PLA Cold Drink Cups & Combination Pots	04-06
Paper Straws	07
Paper Hot Drink Cups & Accessories	08-10
Portion Pots	11-13
Round Paper Food / Soup Containers & Lids	14-17

Bagasse Take Away Food Boxes and Trays	24-28
Clear Round Food Containers	29
Cutlery	30-36

PLA Cups & Lids

PLA Cold Drink Cups & Lids are an eco-friendly alternative to other petro-chemical derived products, which degrade very slowly.

Clear PLA cold drink cups function and look like traditional plastic cups offering the benefits of high clarity and strength.

Available in a range of sizes with various types of lid; flat and domed, with or without a straw slot.

Combination Lids & Portion Pots

Combination portion pots and lids are compatible with all EnviroWare® 96mm Diameter PLA Cold Drink Cups.

Simply clip the portion pot inside the special lid and then fit to the chosen cup.

Ideal for all types of cold foods where the ingredients are required to be kept separate until consumption i.e. granola with cereals, dips with crudités, fresh fruit with yogurt, salads with dressing.

Leaf 2 Double Wall and Single Wall Paper Hot Drink Cups

Leaf 2 Design Cups are available in 3 popular sizes – 8, 12 & 16oz. Choose from white single wall cups or green double paper wall cups which offer increased hand comfort; both types are commercially compostable (DIN EN 13432:2000-12). Double wall cups are now certified recyclable in standard paper mills. Leaf 2 design includes the words “sustainable, renewable, & commercially compostable”.

Made from sustainable FSC® (Forest Stewardship Council® C113967) certified paper. CPLA and bagasse fibre sipper domed lids are available to fit all cup sizes – see page 10 for details.

Bamboo Fibre Double Wall Hot Drink Cups

Our most sustainable hot drink cups yet!
 Made from bamboo fibre, one of the world's fastest growing plants – as quickly as 2 feet per day.

Insulated, double wall cups are made from FSC® (Forest Stewardship Council® C113967) certified bamboo fibre. Coated with a water-based lining.

Certified recyclable in standard paper mills and commercially compostable (DIN EN 13432:2000-12). CPLA and bagasse fibre sipper domed lids are available to fit all cup sizes – see page 10 for details.

Certified 100% recyclable

EnviroWare® bamboo fibre double wall hot drink cups and double wall Leaf 2 hot drink cups are now certified by Papercycle Ltd, as 100% recyclable in standard paper mills.

Empty cups can be recycled through kerbside waste paper collection.

Hot Cup Lids, Sleeves & FSC® Wooden Stirrers

Accessories for EnviroWare® hot cups include bagasse or CPLA lids, kraft coffee sleeves and wooden drink stirrers.

Made from sustainable FSC® (Forest Stewardship Council® C113967) certified wood, drink stirrers are an essential for placing in self services areas when serving hot drinks.

Choose from hygienic individually wrapped stirrers, stirrers in convenient dispenser boxes or stirrers bulk packed in bags for economy.

"Naturals" Heavyweight Plates

Naturals plates are made from heavyweight 3-ply unbleached corrugated board, giving them superior strength over regular paper plates. Coated with a waterbased, food grade barrier which provides grease and moisture resistance.

Perfect for use at buffets and events.

Also available, 12" diameter serving platters.

Bagasse Plates, Platters & Bowls

Bagasse dinnerware is natural white / cream in colour. The range provides an alternative to traditional paper plates and bowls, with bagasse generally being stronger and more rigid by comparison.

These products are suitable for use in cold cabinets and microwaves, resisting water temperatures of up to 100° C and oil temperatures of up to 150° C.

Recyclable* PET clear plastic covers and lids are available to fit some items. This range is free from PFAS forever chemicals and is certified Home Compostable by TÜV.

Palm Leaf Plates, Platters & Dishes

Palm Leaf Plates, Platters and Dishes are made from discarded leaves from Adaka nut palm.

Produced in India, the leaves are collected and cleaned, then mechanically pressed into a 120°C mould with no additional treatments required.

Each individual item has a unique pattern & structure.

Perfect for event catering, buffets & grazing tables.

What are PFAS?

Our latest EnviroWare® bagasse food boxes, offer high performance and are now certified PFAS free and suitable for home composting.

PFAS (per- and polyfluoroalkyl substances) are a man-made, “forever chemical” traditionally added to make bagasse and other types of food packaging water and grease resistant.

Packaging containing PFAS is food safe, the problem occurs when used packaging breaks down in the environment.

PFAS chemicals will not naturally degrade and can end up contaminating groundwater for a very long time. Studies show that very high concentrations may pose health risks.

Benefits of PFAS free packaging

- Better for the environment
- Better for our health
- Free from forever chemicals
- Certified home compostable
- Suitable for hot or cold foods

Wooden Cutlery Dispensers

Zero touch single-use cutlery dispensers offer a perfect combination of hygiene, convenience, and sustainability.

Users have zero contact with the cutlery when filling or using the dispenser, preventing cross contamination. There are no levers or buttons to press – simply pull the cutlery handle from the dispenser.

Disposable cutlery dispensers prevent wastage, as customers only pick what they're going to use.
